Expected Manual Validation

- The generated timeline contains no more than 12 nodes.
- Every year and Act in the SVG matches this document.
- Each roadmap node is linked internally to one or more source IDs.
- No extra Act, year or constitutional fact is invented.
- Node labels do not overlap at normal zoom.
- Zoom, fit-to-screen and pan work in the roadmap viewer.
- SVG download opens correctly in a browser.
- Save and delete actions update roadmap history.
- A topic not supported by the indexed PDF returns an insufficient-context message.
- Browser console contains no new error caused by roadmap generation.

Suggested negative test

Ask for a roadmap on "Quantum Computing Hardware Architecture" while only this PDF is indexed. The system should refuse or return insufficient context instead of inventing a roadmap.

Note: This PDF is a purpose-built test document for local RAG and visual-roadmap validation. The wording is original and deliberately concise.
