

Phase 2 — Build Core Learning Modules

Continue from the existing project.

Do NOT regenerate existing components.

Reuse the current design system.

Build

AI Study Coach

Create a premium learning assistant interface.

This is NOT ChatGPT.

The interface should focus on structured learning.

Include:

- Chat Area
- Suggested Questions
- Quick Action Buttons
- Response Mode Selector

Modes:

- Learn
- Revision
- Prelims
- Mains
- Interview

Each mock AI response should be presented as:

- Topic
- Explanation
- Key Points
- UPSC Relevance
- PYQ References (mock)
- Related Topics
- Generate Notes Button
- Generate Quiz Button

Create a collapsible right-side panel showing:

- Sources
- Related Topics
- Generated Notes

- Bookmarks
-

My Library

Create a document workspace.

Include:

- PDF Cards
 - Folder View
 - Search
 - Filters
 - Bookmarks
 - Document Statistics
 - Mock Document Preview
 - Summary Panel
-

Current Affairs

Create a newspaper-style page.

Include:

- Daily News Cards
- Categories
- GS Paper Tags
- Importance Level
- Summary
- Read More
- Save for Revision
- Generate MCQ
- Search
- Filters
- Weekly View
- Monthly View

Use realistic mock data.

Everything must remain frontend only.
