

Phase 1 — Build the Frontend Foundation

You are a Senior Frontend Engineer.

Build the foundation of a premium AI-powered UPSC Study Platform.

Objective

Create a scalable, production-ready frontend foundation using modern React architecture.

Tech Stack

- Next.js (App Router)
- React
- TypeScript
- Tailwind CSS
- shadcn/ui
- Lucide React
- Framer Motion
- next-themes

Important Rules

Frontend only.

Do NOT create:

- Backend
- API routes
- Authentication
- Database
- AI integration
- RAG
- Fake API calls

Everything should use realistic local mock data.

Folder Structure

Use a feature-first architecture.

Create:

- app/
- components/ui/
- components/layout/
- components/common/
- features/

- hooks/
- lib/
- types/
- constants/
- data/
- styles/
- assets/
- public/

Global Layout

Build:

- Responsive Sidebar
- Responsive Navbar
- Main Workspace
- Mobile Navigation
- Dark / Light Mode
- Collapsible Sidebar

Sidebar Navigation

- Dashboard
- AI Study Coach
- My Library
- Current Affairs
- Notes
- Revision Center
- Quiz
- Progress
- Profile
- Settings

Navbar

Include:

- Global Search
- Notifications
- Theme Toggle
- Quick Action Button
- User Avatar

Dashboard

Create a modern SaaS dashboard using realistic mock data.

Include:

- Welcome Section

- Today's Goal
- Study Streak
- Study Hours
- Topics Covered
- Current Affairs Summary
- Recent PDFs
- Recent AI Sessions
- Weekly Progress Chart
- Activity Timeline
- Quick Action Cards

Shared Components

Create reusable:

- Sidebar
- Navbar
- StatCard
- ProgressCard
- QuickActionCard
- SectionHeader
- SearchBar
- ThemeToggle
- EmptyState
- LoadingSkeleton
- Avatar
- Button Variants

Design

Premium SaaS style.

Clean.

Minimal.

Excellent spacing.

Responsive.

Professional typography.

Reusable components only.

Everything should compile successfully.
